

Dear Ms. Anderson:

The United States Postal Service has initiated a series of commemorative stamps titled the American Art series and has honored Robinson Jeffers, Willa Cather, Henry O. Tanner and George Gershwin.

As next year, 1974, is the 100th anniversary of the birth of the great American composer Charles Ives, I feel that a stamp honoring him on this series would be appropriate.

If you would mention this to your readers and urge them to write the Postal Service requesting such a stamp, perhaps it might be issued. Write the Stamp Advisory Committee, United States Postal Service, Washington, D.C.

Sincerely,
Douglas B. Moore
Williams College

ed. WRITE ALL YOU EARS!

Anna Lockwood is on the faculty of Hunter College in N.Y. this fall and we hope she visits Oakland before spring*

Phil Musser has been at Mills working on an electronic mass and will be going back to the U. of Illinois, Urbana.

Bob Ashley is touring England and Europe with Alvin Lucier and David Berrymann in October. Maybe they'll run into SUONO DELLA FONTANA in Germany or Charles Amirkhanian in Holland.

Charlemange Palestine is off to Paris to produce his sounds and he'll be back by Halloween (in N.Y.C.). It would be a good idea for somebody to fund an evening of his music sometime this year (in S.F.). Listening?

Gordon Muma is teaching at U.C.S.C., we think, for the entire year. He will also be at Mills for three weeks as a Rockefeller composer before going home.

John Cage will probably be out in November to pick mushrooms around Aptos and Eureka and to see friends! Please come see us when you come!

Larry Austin arrives mid-November with new works to show to everyone. See his letter for details.

ZAJ is moved? Milan must be happy. Please send address!

Phil Glass will probably give a concert at Mills this year. Next month EAR will print his 1+1 for one player and amplified table-top.

FREE, a 1969 publication of the Mills Tape Music Center, is out of print—at last! Good stuff! The New Look, a 1973 publication of the same institution is about to do a new issue—an expanded LOOK. Where's FILE?

If you know of someone or something that is coming or going or about to do either, tell us. We love it! EAR, 991 39th St. apt. 1, Oakland 94608.

Phil Harmonic invites you to send for your own personal realization of F.F.C. by sending a self-addressed, stamped envelope to P.O. Box 9887, Oakland, Ca. 94613

The Radio Music City Hall
Symphony Orchestra

Bob Sheff, otherwise known as "Blue" Gene Tyranny, talked to EAR this month about his New Music Ensemble commission. It's called HOW TO DO IT and is concerned with spreading information, knowing, and trusting. It is actually a realization of a piece Bob did in Ann Arbor in 1969.

"Blue" Gene says, "I used to be in this rock n roll band and wanted to conjure up a way that we could sing and make music about what had happened that day, or that evening when somebody would shout something during the gig, or be able to stage a dream that someone had last night now or long ago. This is the piece and parts of it have been done over the last four years."

There are four parts to the setup. The first is known as PICKUP and has to do with oneness. "It's not just gathering or creating "information" and arriving at a decision, it's keeping in touch with the motions by which you do know, treating all experiences as real..."

SHUFFLE, the second part, deals with extremes as "S" and "P". "Input can be dealt with as having at the very least two initial conditions. These can be far removed (contradictions, extremes) or only slightly different (another view, another feeling)." Twoness is explored.

DO IT is the third area. After all that searching and transforming, we're ready. There are at least three possible actions for any given situation. You can do it or not do it or gradually try it out and transform your actions. In astrology these possibilities are called cardinal, fixed, and mutable.

WHAT HAPPENS is the fourth area. In it, at least 12 acoustic events having something to do with the initial input are played improvisationally. The whole setup is reversible.

Serge Tcherepnin's new synthesizer will premiere in

F. PERFORMERS

After all this talk, Bob says if you go to the concert to hear his piece, all you'll hear is 6 chords and a couple of sentences for 30 minutes. He's grinning.

Bob attended Eleanor Breckenridge Elementary in San Antonio, Texas from 1951-1954 and has played with Iggy and the Stooges. His closest associates are Phil Harmonic and Clay Fear and he claims to have been strongly affected by Monte Cazazza. His progressed chart reads sun in aquarius scorpio rising. Eh, la. lalalalalalalalalalalalah.

PLAY QUIETLY. EACH EVENT, A NOTE OR CHORD, IS PLAYED $pp \leftarrow p \rightarrow pp$ WITHOUT ATTACK IF POSSIBLE (AIR SOUND TO NOTE TO AIR SOUND) AT THE BEGINNING OF AN EVENT.

* PERFORM SIGNIFICATOR (FINGERSNAP, SLOW BRIEF RIFF, "OH YEAH", "UH HUH", ...) ON THESE CHORDS

DENSITY - USE ANY OCTAVE RANGE EASY ON INSTRUMENT. ON CHORD INSTRUMENTS, START FROM 3 NOTE CHORDS \rightarrow 2 NOTE CHORD \rightarrow SINGLE NOTES \rightarrow 2 NOTES \rightarrow ...

ON SINGLE NOTE INSTRUMENTS, CHORDS ARE ARPEGGIATED (WITHIN THE SAME DURATION AS A SINGLE CHORD) WITH 3 NOTES \rightarrow 2 NOTES \rightarrow ONE NOTE OF THE CHORD \rightarrow 2 NOTES \rightarrow ...

ACTION PERFORMERS -- PATTERN OF SEARCH IS IMPROVISED.

" " " " IS ALWAYS THE SAME WITH CLOSE MOTION: ACROSS \rightarrow DOWN ONE LINE REVERSING DIRECTION \rightarrow ACROSS \rightarrow ...

-- PATTERN OF SEARCH IS IN THE SAME DIRECTION FOR LINE (ACROSS, DOWN OR UP, ON THE DIAGONAL) THEN TO ANY OTHER LINE IN ANOTHER DIRECTION.

PERFORMERS O = NON-rhythmically,
PERFORMERS O = O (ddd, or ddd) where $d = 30\text{ mm} \rightarrow 50\text{ mm} \rightarrow 30\text{ mm}$,
DETUNE UPWARD WHILE CHANGING THE PLACE AND WAY OF PLAYING ON THE INSTRUMENT IN ORDER TO PRODUCE NOTES AND CHORDS ALWAYS IN THE SAME KEY (F) (ALWAYS SAME RESULT).

PERFORMERS O = O (ddd, ddd, ddd) where $d = 50\text{ mm} \rightarrow 30\text{ mm} \rightarrow 50\text{ mm}$,
DETUNE GRADUALLY DOWNWARD \rightarrow RE-TUNE \rightarrow DETUNE UPWARD \rightarrow RE-TUNE \rightarrow DETUNE DOWNWARD \rightarrow ... WHILE MAINTAINING THE SAME PLACE AND WAY OF PLAYING ON THE INSTRUMENT (SAME MOTIONS, DIFFERENT RESULTS).

REHEARSAL FOR NEW MUSIC ENSEMBLE
SUMMER 1973. R. H. B. P. F.

no zip, no subscription:

Dear **EAR** editor:

It was suggested we might send you some of our music. We have no idea if it is possible or legal or whatever to print these. The large one is from "Stimmung" by Karlheinz Stockhausen. The Sound Patterns speak for themselves. Please keep these copies and use them or not, whatever you think is best. Same for article.

Sincerely,
The X-Chorus

ed. We'd love to print something that has not been published! We don't know if its legal either, but think its more useful to print things that would not be printed elsewhere in more glossy journals. Thank you for the article and we hope lots of our readers write choral pieces for you—why not try commissioning some bay area people?

The California Cello Club is offering two prizes for unpublished compositions for cello. The compositions should feature, the cello, either in a work for solo cello, or for cello and orchestra (chamber or full orchestra), or for cello and one other instrument.

Two prizes of \$250 each are offered. One of them is the Abe Sherman Composition Award in honor of the late Abe Sherman, Instructor of Music at the University of Ca. This prize is made possible by the generosity of his friends, as a memorial to his interest in composition and his encouragement to young cellists in the bay area. The contest rules involve certain procedures to preserve the anonymity of manuscripts. The contest rules should be requested before sending submittals. Send inquires to: Phyllis Luckman, California Cello Club, 668 Fairmount Ave. Oakland, Ca. 94611. Deadline: Dec. 31, 1973.

Musical Arts, Inc. in West Contra Costa has a position open for conductor of a chamber chorus. The chorus of six performing groups sponsored by Musical Arts in its third season this fall. For an interview, phone the Musical Arts Office, 253-1466, or write P.O. Box 1000, Richmond, Ca. 94802.

The Washington International Competition for Singers is offering four prizes from \$1,000 to \$500 apiece. The purpose of this is to select young artists now ready for, but not yet launched upon, a professional singing career. For more information: Ms. Theodore Woolsey, 101 Rayburn Rd., Bethesda, Md. 20034 or (301) 320-3096.

News From the Vegetable World

Dear Friends:

We are pleased to call to your attention our impending fourth annual community concert series which is an integral part of the Symphony In-School Program now in progress and serving public, private and denominational schools throughout our city. Six successive Friday evenings at 8:00 pm beginning Friday, September 21 and concluding October 26. Admission is free. We know you and your members will enjoy joining us during these exciting and happy evening concerts.

Sincerely,
Mrs. Agnes Albert
San Francisco Symphony Association

EAR-

1. thanks i was given a free copy of ear at cody's next time tell them that one has to pay for this treat.
2. enclosed is money am too poor for a checking account
3. funding idea? beth and peggy drag out broken electric piano and do music on sprout plaza. get down to the people?
4. critical articles on things like the music business would be nice to read (as long as they're not boring) like how we rely on publishers to make us "famous" and give us money but also how they rip us off. there must be alternatives!
5. also: a list with information on performers and composers competitions (such as california cello club composition contest sorry about the alliteration)
6. a piece in AB form for Ear readers:

A. watch earring move on woman's ear for ten minutes
B. place one minute on the table and observe it for two minutes

remember: draw no straight lines and never follow

without regret:
Jeff Perione

Nobody can be exactly like me. Sometimes even I have trouble doing it.
—TALLULAH BANKHEAD

Dear Beth:

Sept. 11, 1973
Eve of Austin's 43rd

Just finished Sevenear over coffee. Made me homesick for the bay area, enough to write you that I'll be visiting same in late March, 1974, and possibly in mid-November, upcoming. Perhaps we can get together one of those times.

I am in the process of finishing two new pieces: the one nearest completion is called Tableaux Vivant, Sacred and Profane. TV is a collaboration with master printer Chuck Ringness of GRAPHICSTUDIO here at USF, a set of four prints to be seen and heard, performed or not. There will be 10 sets (for sale, incidentally) finished by November and hung and played at SYCOM's Event/Complex #4 on Nov. 6. I hope to be able to bring along a set on my California trip. The second piece I'm working on is a film tape to be used as a sound track for a Stan Vanderbeek film. That also must be finished by November. Hopefully, I can bring along a copy. John Mizelle—remember him from Davis??—is joining the faculty here at USF (that's confusing, isn't it), Tampa...lasers, computers, religious music.

Send people.

Love,
Larry Austin

ed. Hope to see you and your new pieces in Nov. Thanks for the 2 yr. subscription and enjoy your 43rd year. 4+3=7 a year of renewal and potential wisdom. Love.

The Dilemma

This is a piece for any combination of sound generators.

take your time and try to feel your chosen flow.
each sort of tremble has a discrete import.

— J. Garlick

Contemporary Art

The National Federation of Music Clubs announces a contest for young composers with Victor Herbert-ASCAP Awards of from \$1,000 to \$75. Works must be either a sonata for wind or string plus piano, a choral work, solo piano in sonata or variation form, or vocal solo plus accompaniment. For more information: NFMC Headquarters, Suite 1215, 600 S. Michigan Ave., Chicago, Ill. 60605.

Ad Artem Meliorendam Choral Auditions may be arranged by telephoning Leo Nester at 548-6203. This new group will specialize in unpublished, unrecorded, and otherwise atypical concert fare. Mr. Nester is a graduate student at Cal-State Hayward and the conductor of the new group. He wants good sight-singers and will limit the group to 24 persons.

Announces

NANNY GOAT HILL

Nanny Goat Hill is open on 24th Street. It's something new in San Francisco, a wine and cheese cafe in the European tradition.

There are over 300 wines available ranging from a modestly priced house wine sold by the glass and carafe to the great vintages of France and Germany. Every day we select a special wine from our cellar and offer it by the glass. There are also many beers, ales, juices and cider.

Our cheeses are presented in prime condition with French bread, sweet butter, fruits and raw vegetables. Various cheese dishes and salads are served along with Fondues and Raclette.

Come in and have a glass of wine, lunch, dinner or light meal anytime. It's a place to be comfortable.

Open Daily from 11:00 to Midnight
Friday & Saturday until 2:00 a.m.

NEW PORT COSTA PLAYERS

AXONY

*Jim*Nollman*

*Bend the neck as an iron hook
Expand the chest as an earthen pot
Tie the breath into a bow
And shoot it forth like an arrow...

...A musical event suddenly appears which concentrates a minimum amount of sound variation over a maximum duration of time. It may come as a single burst of sound- The shouting of New Year's cheer which occurs only once per year. Or a drone- such as that of sitting in an airline terminal with the slow pulsations of planes passing overhead, and the babbling of mouth talk all around. The exclusive sound event of doctors pressing stethoscopes against young chests; one after the next, during a school health examination. Or that of deep breathing amplified through saxophones, terminal cancer wards, or Pranayama exercises. It all depends on how a person decides to parenthesize his perceptions.

Listening? Did you listen? Have you just listened? Will you ever? Each period of listening becomes a sound event. Or, to use parentheses: Each period of (listening becomes a sound event). And, of course, we are still forever plagued by the decision of whether or not some sound events become (Me)o^o zik while others are left to lie around like so many pieces of shit.

One consideration: Does time ever seem to stand still? Another: Does time ever stand still? There is only one word difference between the two sentences; Can you find out which word has changed? They are, simply, mutually exclusive levels of awareness. The awareness of time coming to a S TTT o PPPPPPPPp!!? A similar effect can be garnered by driving for four or more hours alone on a superhighway at night. Between the second and third hour..... it just seems to disappear. But you're not asleep, and you're certainly not enlightened. The drone of the motor is at least partially responsible for this empty duration. This eternity. How do you know that General Motors doesn't have at least one magic compeser on its payroll.

at least one magic composer on its payroll.

How can a composer manipulate sound to make time stop? Perhaps he begins by learning to not-manipulate SOUND and instead concentrates on the temporal significance of his Music. Can there be a composer who does not manipulate sound? Temporal significance? Time, as it were, becomes more than just a vehicle for a lot of notes and signatures.

TIME AS JELLY IN ME HANDS

Time is a very difficult thing to talk about. As an abstract thing it is often inconceivable. But it need not be a thing, and instead can be a relationship; the great liquid jelly in which all of our processes are forever suspended.

So what is our temporal significance to music? Music in performance is occasionally a present tense experience. It is

This is EAM's composers'-artists' list. Instructions are: begin with two editors' lists of ten apiece and have each person named, send the names of ten more. Then everyone will have heard of everyone else!

John Adams	Joanna Brouk

sensation...acoustics...listening. It is present tense when time stops. It is present tense when there is no time. Time occasionally stops for the performers, rarer still, for the audience. Most Usually however, a concert becomes a group of performers trying desperately to predict and control what sounds their bodies and instruments will produce. This is performance as future shock. Most concert music; with its "entertainment value" and "virtuosity" and acoustical gymnastics exists with a temporal significance in the future. And the audience claps wildly at a job well done.

Now musical journalism is based upon the descriptive recollection of what may have once been a present tense event. It puts music into a context of the past: "Last night, this critic was privileged to attend a concert where time seemed to stand still." All of us have read this sort of thing; in fact, the critique is sometimes so well written that we decide it wasn't necessary to have been there. We now know what was listened to last night. You see, musical criticism can be music. It is music with a temporal significance to the past.

Let me call this past context a...
...BRIP: a word or event whose temporal
significance exists in the past.
And STASTA: a word or event whose temporal
significance exists in the future.
Journalism...the word happened...Nostalgia
all are brips. Most concert music...the
phrase "to be enlightened"; both are stasta

Now say you came across this piece:
PRE*CAMBRIAN

Directions: Read the directions for this piece tomorrow.

This little bit of conceptual fluff is almost pure stasta. It's only flaw is that part of its impact depends on how many days you remember having read it. "Last night, this critic was privileged to attend a concert of PRE*CAMBRIAN where time seemed to stand still."

As I hinted before, I'm interested in having you consider time as Jelly in your hands.

And most importantly, some day, some where, some composer may create an enduring present performance. But you better hope that the government doesn't get to him before You've had a chance to truly LISTEN. After all, if this kind of Hocus-Pocus is allowed to spread, it would throw us all back into the stone age.

*Shoes here, Shoes there,
Give me a couple, I'll give thee
a pair.*

Mr. Nollman will present The Song
of HOON I KWAK on October 28, at 69
Central Street in San Francisco.

Sybl Chickenmint of Philadelphia a former snake handler
says double-grapefruit percussion, currently performing
that counts. its what's up front.

This is the 'last' page of my TULIP CLAUSE, the result of a commission by the New Music Ensemble. All of the performers have different numbers and arrangements of the same nine score pages. The instrumentation was chosen numerologically (like everything else)—timpani, string bass, cello, organ, B-flat clarinet, alto flute, tenor sax, bass clarinet, and tape.

The ninth page is the most densely populated, but it is not necessarily the last page. In fact, it is the last page in only one part—the timpani. That happened because in my code, "i", the last letter in the word "timpani" stands for "9". I print the code below, so that you can get a better idea of it.

1 2 3 4 5 6 7 8 9
a b c d e f g h i
j k l m n o p q r
s t u v w x y z

This was the basic code, but when I had to translate the letters in the words in the speech I used, to derive the pitches, I had to modify the code. (You are not lost. This is just a little involved.) The reason this was necessary, is obvious— instruments do not have their choice of more than seven letters that stand for pitches, i.e. a, b, c, d, e, f, & g.

So, the code for the pitches was:
1 2 3 4 5 6 7 (stands for the number of the typeface)
a b c d e f g natural pitch
h i j k l m n natural
o p q r s t u sharp (indicated by an upward arrow)

8 9 0 flat

If you are wondering about the stars, I used them to allow the performer his or her choice of pitch. They came about as the different letters became extinct (extinct in this system, at least). The players still have to modify the pitches if the stars have arrows.

The speech that served as the basis for TULIP was given at Chabot Observatory this summer and was entitled, "Jupiter In the Summer Sky". The speaker said "uh" often and repeated himself, so, motives appeared and appear. The tape was made from the speech, including the educational film that was shown with a projector that did not run properly. It went "flat and Sharp" just as the instruments go both ways.

Rhythms are created from the pitch groupings (that were derived from the original words). Words are made of phonemes, but they are not distinct as points are. The rhythms are therefore not serialistic-pointalistic utterances, but come together to form "sensible" matrixes, as phonemes form words.

Timbre and amplitude are, respectively, full and unaggressive. These are traits, but they work in relation to the players' sense of the entire work and reaction to the immediate typeface.

The player's involvement and belief in the underlying structure of the music is necessary. Without a knowledge of the composer's sincerity and affinity AND artistry (all probably the wrong words), the music suffers.

Assuming that the players understand and trust and follow the basic rules (of octave transposition, amplitude, pitch bending, pitch choice, rhythmic word-flow, etc.), they then need to get used to playing with each other, so that at the very least, they will end together. This is harder than it may seem. The sax part has 14 pages because there are 14 letters in t-e-n-o-r-s-a-x-o-p-h-o-n-e and the cello has only 5 pages. They start and end together and play continually, so, the sax has to go much faster and yet retain the feeling and tone.

I hope this month's HOW TO READ didn't confuse you all. Please write and ask any questions you'd like and of course you are invited to TULIP's performance at Stanford and SF Museum this month. see concert guide for dates. —B.A.
